

## **SUPPLEMENTAL DIGITAL CONTENT 1**

**Figure.** Flow diagram of patient selection.

100 patients consecutively treated  
with single-isocenter, frameless SRS  
for multiple brain metastases

```
graph TD; A[100 patients consecutively treated with single-isocenter, frameless SRS for multiple brain metastases] --> B[85 patients consecutively treated with static beam IMRS (excluded)]; A --> C[15 patients consecutively treated with VMAT];
```

85 patients consecutively treated  
with static beam IMRS (excluded)

15 patients consecutively treated  
with VMAT
